TheWorkshop

For Students

—

GradSchool is the place to enhance, support and grow your studies and work, catalysing your ambitions and setting you up for your career.

Join Us

—

The Institute occupies a space like no other for creative thinking, researching, imagining and doing, with the focus on fusing technology and creativity with communication, making and sustainability. GradSchool is a place to grow your skills, ideas and creativity, while expanding your capacity for innovation, leadership and business development.

A Place To Thrive

—

Our small scale and diversity offer a unique working environment which draws together students, academics, businesses and a huge range of partners, all united by a desire to experiment, collaborate and create. Ravensbourne University London's unmatched connections to the creative industries mean that, at GradSchool, study and practice go hand-in-hand. Our programmes are designed to build your skills, network and profile as a practitioner, keeping you close to the heart of your industry.

ResearchRave

TheWorkshop

For New and Existing Businesses

—
Work and grow at the heart of a dynamic new creative tech community.

Competitive Advantages

—
Incubation+ is a friendly, human-scale collective founded on connections and collaborative working. We provide extensive commercial support including accelerator programmes, business mentoring, exposure to investors, commercial partnerships, networking events, and office space with cutting edge interior design, as well as branding expertise from our in-house creative team. Incubation+ is also home to knowledge exchange, with opportunities to work with student talent, academics and researchers.

Be Part of an Ambitious Community

—
Join a place where learning, creativity, leadership, innovation, branding, marketing and business coexist to offer new opportunities, new skills and new challenges to elevate your offer. Find pathways to explore, experiment and grow your business, project or initiative by connecting with a wide range of creatives, from researchers and businesses to funders and potential partners.

Enter the Unexpected

—
Benefit from a responsive and flexible approach that supports what you need right now, and helps you anticipate and define what you will need in the future. From individual mentoring to the MR/VR lab, Incubation+ is equipped to help you unleash the true potential of your business.

A horizontal navigation bar with five rounded rectangular buttons. From left to right, they are labeled 'GradSchool', 'Incubation+', 'CreativeLab', 'ResearchRave', and 'TheWorkshop'. The background of the bar is a collage of four images: a purple and red abstract texture, a grey and black textured surface, a black background with white code, and a colorful abstract pattern with red, blue, and yellow lines.

CreativeLab

ResearchRave

TheWorkshop

For Industry Partners

—
CreativeLab offers insight, connectivity, innovative thinking and new approaches.

Competitive Advantages

—
The Institute puts you in front of the next generation of creative leaders, supported by leading edge production facilities including VR/AR and a wearable tech lab. Dedicated project management support allows you to effortlessly access resources and knowledge from across the university.

New Areas of Exploration

—
CreativeLab connects you with our diverse community of students, researchers, state of the art technology and creative businesses that will take your concepts, products, projects and initiatives to the next level. Join us and create brand stories with impact through creative, socially-minded and purpose-led projects.

Focus on the Results

—
We provide dedicated resources alongside extensive experience of delivering commercial projects in partnership, ranging from in-course integrations to one-off commercial design services.

For Researchers

—
Realise inspired concepts through leading edge design and analysis.

Competitive Advantages

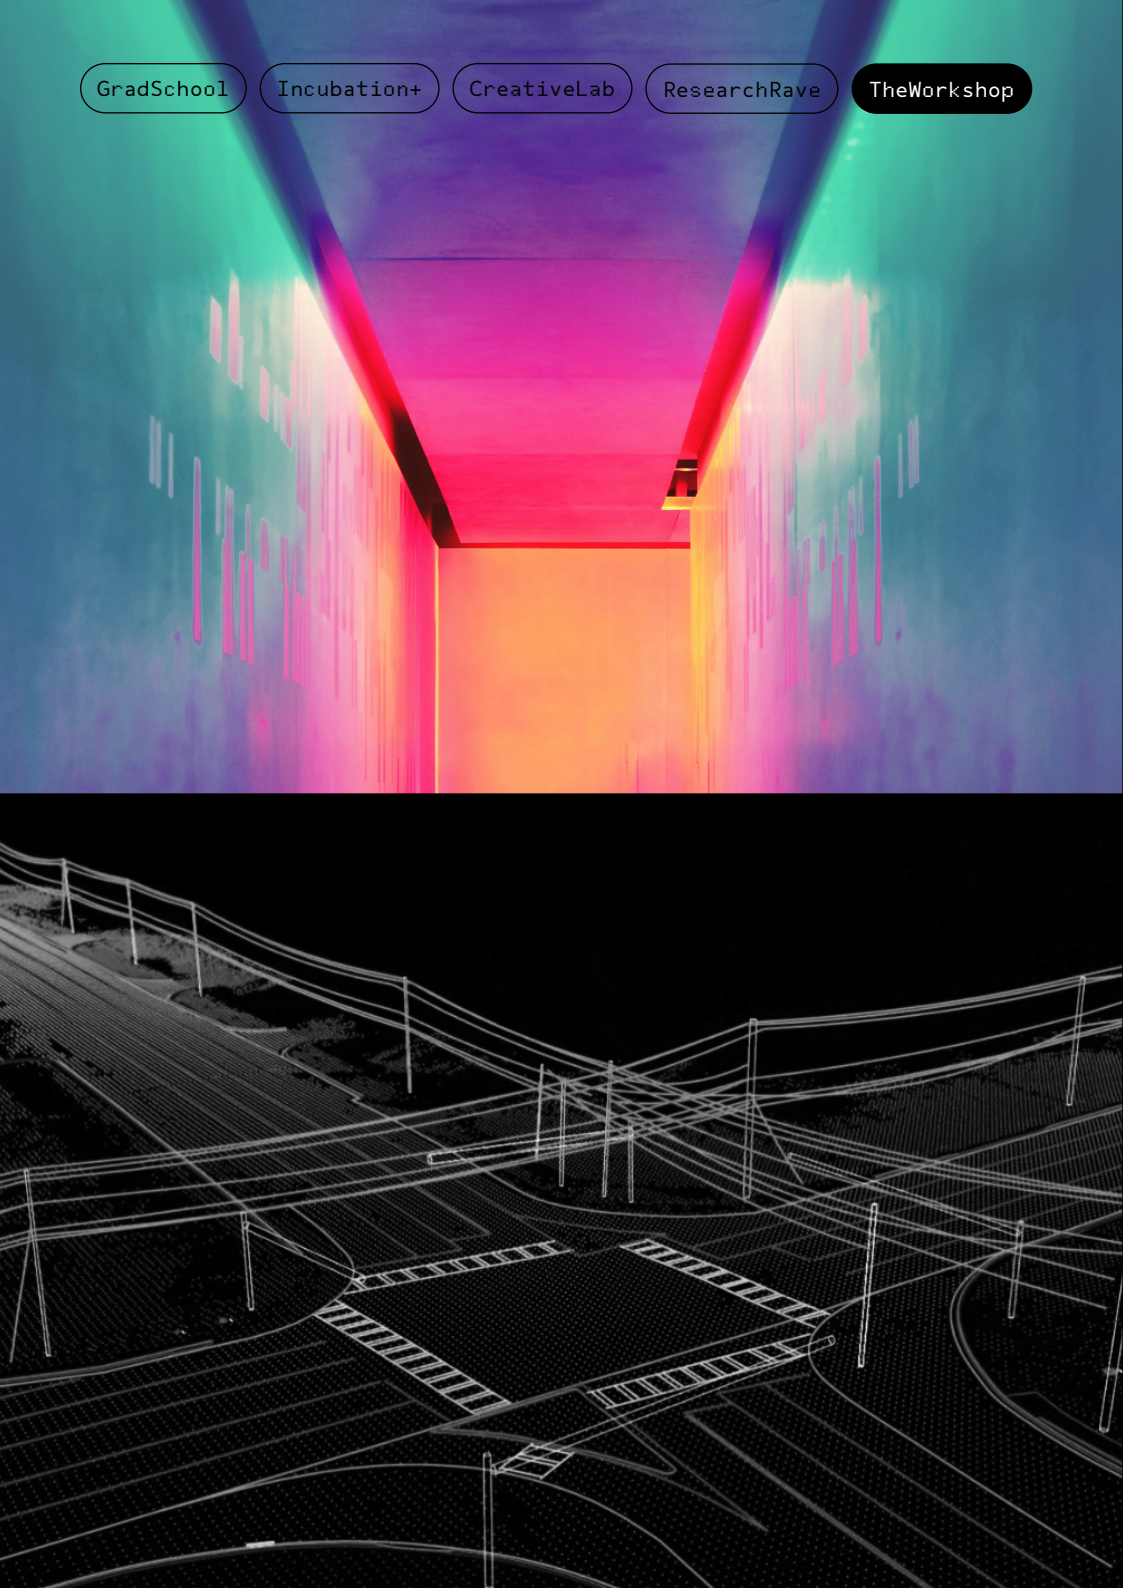

—
ResearchRave has extensive experience in validating research work and creating successful funding bids. Join us for access to cutting edge prototyping facilities, including VR/AR and wearables, as well as project support from research advisors and our in-house creative agency, CreativeLab. Our commercial team is here to support your business planning, as well as providing legal advice on issues including IP exploitation.

Join us at the Forefront

—
Be part of a leading experimental community exploring the potential of creative technologies. Our specialisms include immersive and augmented realities and wearable tech, and our reach extends widely into other sectors including mental health, engineering, construction, sport and entertainment. Our technology specialists and extensive community of partners will support you in turning experiments into impactful reality.

Increase Your Reach

—
Benefit from our collaborative approach to realise the potential of your work and create new connections. ResearchRave brings together academic and commercial partners, and our work is underpinned by the support of the wider networks of the Institute and Ravensbourne University London.

ResearchRave

TheWorkshop

For Industry

—
Access, inspiration and inclusion
in a dynamic new environment.

Competitive Advantages

—
TheWorkshop offers accessible and fully-supported prototyping and workshop facilities, printing, a VR/AR lab and more. Located in the Institute's brand new building in London's Design District, TheWorkshop also has a hireable event and exhibition space. From rapid prototyping and more detailed 3D and stochastic printing to the development and testing of immersive environments, we offer the opportunity to visualise and experiment with the support of our experienced practitioners.

Learn While You Make

—
TheWorkshop's technicians are on hand to support and guide you through the processes of making to transform your concepts into reality.

Be Part of the Community

—
TheWorkshop is a hub for the creative community in and around Greenwich Peninsula, with local focus and global reach.

The Institute for Creativity
and Technology is an open
organisation dedicated to
shaping sustainable and ethical
interventions in the creative,
technological, leadership,
innovation, and social spheres.

Join our diverse community of
ethical thinkers, creators
and disruptors and be part
of our evolving culture of
experimentation, curiosity
and innovation. The Institute
takes hi-tech, lo-tech, no-
tech exploration and leading
edge design and analysis to new
frontiers in a space like no
other in London's new Design
District.
