

Sewing machines

Owning a sewing machine for home use is *not* essential. Some students find it useful as an extra resource, particularly when university is not open.

Whilst domestic machines are suitable for basic tasks, such as prototyping, the machines on campus are industrial standard. This will ensure work can be finished to a more professional standard. We have plenty to go around and have extended openings during busy periods to support flexible access for all.

Please note that domestic properties electricity supplies and/or loading weights may be unsuitable for some industrial machine hire, so please ensure you do your research and speak to the supplier before committing.

Sales, hire and servicing of existing machines <https://sewingmachinesuk.co.uk/>

Please mention you are a Ravensbourne student when ordering as they may offer a preferential rate or payment terms. On delivery of the industrial machines Sewing Machines UK should set up the machine, offer a safety briefing and full training session.

Here are a range of machines you may wish to consider

[Janome HD2200 Sewing Machine \(semi-industrial\)](#)

[Juki TL-2300 Semi Professional Sewing Machine](#)
